Non-IFRS Measures

EBITDA is a non-IFRS financial measure. The term EBITDA does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other companies. The Company defines Adjusted EBITDA as net income from continuing operations before net interest income, plus taxes, depreciation, amortization and stock based compensation. Management believes Adjusted EBITDA is a useful supplemental measure from which to determine the Company's ability to generate cash available for working capital, capital expenditures and income taxes.
